

Task 2:

- Move from C: drive to D: drive.
- Create a new directory with your roll number (e.g., 25K-1234).
- Inside that directory, create a file named f1.txt.
- Add the following line inside f1.txt:
"This lab is helping me to learn basic CMD operations."
- Display the list of files/directories in the current directory.
- Display the content of f1.txt in CMD.
- Display the current date in CMD.
- Change the CMD background color to white and foreground (text) color to green.
- Create another file named f2.txt, copy the content of f1.txt into f2.txt, and then delete
f1.txt.
- Save this task with your roll number as the file name.

```
Command Prompt

C:\Users\student>D:

D:\>mkdir 25K-3021

D:\>cd 25K-3021

D:\25K-3021>dir> f1.txt

D:\25K-3021>echo This lab is helping me to learn basic CMD operations. > f1.txt

D:\25K-3021>dir
Volume in drive D is New Volume
Volume Serial Number is DEA3-486A

Directory of D:\25K-3021

26/08/2025  10:16 am  <DIR>          .
26/08/2025  10:17 am                56 f1.txt
               1 File(s)                56 bytes
               1 Dir(s)  154,571,980,800 bytes free

D:\25K-3021>type f1.txt
This lab is helping me to learn basic CMD operations.
```

```
Command Prompt

D:\25K-3021>type f1.txt
This lab is helping me to learn basic CMD operations.

D:\25K-3021>date
The current date is: 26/08/2025
Enter the new date: (dd-mm-yy) color [attr]
The system cannot accept the date entered.
Enter the new date: (dd-mm-yy)

D:\25K-3021>color [attr]
Sets the default console foreground and background colors.

COLOR [attr]

    attr          Specifies color attribute of console output

Color attributes are specified by TWO hex digits -- the first
corresponds to the background; the second the foreground.  Each digit
can be any of the following values:

    0 = Black      8 = Gray
    1 = Blue       9 = Light Blue
    2 = Green      A = Light Green
    3 = Aqua       B = Light Aqua
    4 = Red        C = Light Red
    5 = Purple     D = Light Purple
    6 = Yellow     E = Light Yellow
    7 = White      F = Bright White
```

```
Command Prompt

    0 = Black      8 = Gray
    1 = Blue       9 = Light Blue
    2 = Green      A = Light Green
    3 = Aqua       B = Light Aqua
    4 = Red        C = Light Red
    5 = Purple     D = Light Purple
    6 = Yellow     E = Light Yellow
    7 = White      F = Bright White

If no argument is given, this command restores the color to what it was
when CMD.EXE started. This value either comes from the current console
window, the /T command line switch or from the DefaultColor registry
value.

The COLOR command sets ERRORLEVEL to 1 if an attempt is made to execute
the COLOR command with a foreground and background color that are the
same.

Example: "COLOR fc" produces light red on bright white

D:\25K-3021>color 72

D:\25K-3021>dir> f2.txt

D:\25K-3021>copy f1.txt f2.txt
Overwrite f2.txt? (Yes/No/All): Yes
    1 file(s) copied.

D:\25K-3021>
```
